TAYLOR'S WORK FOR COMPENSATION BILL

When the news that the adjusted compensation bill has been passed over the Presidential veto by the senate flashed from Washington to Indianapolis where fifty or more American Legion national executive commiteemen were in session, one name, and one name only was in their minds-John Thomas Taylor.

For more than five years Taylor, a young Washington lawyer of recognized brilliance and an ardent Legionisire, had been directing the Legion's ight for passage of the bill. Either as hairman or vice chairman of the Letion's national legislative committee, he had been steering legislation bene-ficial to the disabled veterans and other ex-service men. He knew every senator, every representative in Washington. He was liked for his winning his ability to present a case convincingly to the men in whose hands rested the nte of legislation in which the Legion vas interested. Six times he had got the adjusted compensation measure through the house by overwhelming majorities. Three times the senate had given the bill its support. Once fate intervened and blocked its final nactment; once the late President larding had swept away Taylor's efforts with a stroke of the pen.

But this time, he intended nothing to interfere. The crucial moment had arrived, and as Taylor says himself, the quicker and don't lose my head. With consummate skill he brought the

"Now or never. The Legion is go

When the vote was finished the count stood 50 for and 26 against. One paired vote made Taylor's precount exactly right. He had figured precisely what was going to happen. It was not for nothing that he had stood guard over the Legion's legislative interests for six years. He had pre-pared graphs, charts and had worked for the passage of the adjusted comciseness of a chemist precipitating a hemical mixture.

The national executive committee men of the Legion in recognition of Taylor's unflagging work presented him with a handsome watch as a token

of their esteem. Taylor began his army life as a buck private in the infantry, May, 1917. He was then thirty-two years old. In August, 1917, he went to an officers raining camp and came out a first lleutenant. Seventeen months of over seas service followed during which he fought at Chateau Thierry, Vesle river and Meuse-Argores. His outfit was the first to cross the border when the Army of Occupation moved inte Germany. He was discharged a cap tain and returned to Washington to take up his neglected law practice. But Legion work interested him, and he in a large measure for the passage of many pieces of legislation, notably the Sweet bill, which increased the com pensation of disabled comrades.

"NOT GUILTY!"

SYNOPSIS.—Word that their nightly froites are distributed in a party of "high-toned Britishers" recently arrived at the Lodge, among them an army captain and his sister of the same name as himself, is brought to Jack Kilmeny (known to his in limates as Crumbs) and some friends camping on the Gunnison in Colorado. Called to account for the uproar by Dobyans Verinder, snobbish millionaire, member of the British party, Jack snubs that individual and has a friendly chat with Moya Dwight attractive Irish girl. Jack has neuse for his British relatives, two of whom he knows are at the Lodge. While fielding, Kilmeny again meets Miss Dwight, and by her is introduced to the other members of the party, chief of whom are Lord and Lady Farquar, as "Mf. Crumbs." Jack is immensely impressed by the love liness of Joyce Seldon, companion of Moya. Next day, at Gunnison, the Farquhar party sees "Mr. Crumbs" win the bucking bronche championship. "Certain about my guilt this time,

He said it almost with a sneer, but nothing could crush the resurgent, glow in her heart. Why was it that the mere presence of this man called to her so potently and shook her confidence in his guilt?"

"We found the money," she explained, thinking to confound him. "I guessed that. It was gone when I went to look for it this morning. I've come for it now."

His assurance amazed her. "Come for it!" she repeated. "It isn't here." "No, I didn't expect to find it in your purse. But it is at the Lodge."

"Where, then?"

"I sha'n't tell you. The money will be returned to those from whom it was stolen."

He bowed, turned away almost at a run, and was lost in the small willows Presently she heard the sound of a galloping horse. He was following the cutoff trall that led to Gunnison,

She wondered what was taking him away so abruptly. He had meant to stop, then had changed his mind. He him here tomorrow, and if he were late for the appointment she must wait. His impudence was enough to She would show him about that. If he wanted to see her he must come to the Lodge and face Lady Jim. Even then she would not see him. Why should she, since he was what he was?

Ah, but that was the crux of the whole matter! Had he proved his innocence and been released? Or had broken prison, an alternative of which he was quite capable? And guilty or innocent, what could be the explanation of his extraordinary de uand that she should turn over to him the stolen money? She divined again the hint of a mystery. Something deeper than reason told her that the unraveling of it would prove him no

One immediate duty alone confront ed her. She must confess to Lady Farouhar that she had met and talked with him again. It was likely that she would be well scolded, but it was characteristic of her that she pre ferred to walk straight to punishmen doubt she had been too free with this engaging a straight and narrow road in which she must walk. She was to know only such people as had the password, only those trimmed and trained till there was no individuality left in them. From birth she had been a rebel, but an impotent one. Each revolt had ended in submission to the silken chains of her environment. Fret as she might, none the less she was as much a caged creature as Lady Jim's canary.

Jack strode through the young alders to his horse, swung to the saddle without touching the stirrups, and

An hour of rapid travel brought him to the Gunnison road. He swung to the ground and examined the dusty roadbed. Apparently he was satisfied, for he took his sweat-stained horse back into the brush and tied it to a cottonwood. From its case beside the saddle he drew a rifle. He retraced his own steps and selected carefully a place among the thick bushes by the With his pocketknife he cut eveholes in the bandana handkerthat had been round his neck and tied it over his face in such a way as to conceal his features entirely. Left to herself, Moya tried to sleep. It was no use. She was wide awake, beyond hope of another nap. No sooner had the voices of the riders died in the distance than she was dressing feverishly. She told herself that she would go outdoors some where with a book and rest,

She made an elaborate pretens with herself of hesitating which way to go. Her thoughts, her eyes, and at last her footsteps turned toward the grove where yesterday Jack Kil-meny had surprised her. But she was too used to being honest with herself to keep up the farce. Stopping on the trall, she brought herself to time

So she put it to herself, frankly and contemptuously. But no matter how she scorned herself for it there was not in her the strength to turn back on her temptation. Slowly her reluctant steps moved toward the grove.

She reached her flat rock and sank upon its moss ungreeted. Her disap-pointment was keen, even though reason had told her he dared not show himself here after adding a second crime to the first, and this time against her friend, the man who had offered to stand by him in his trouble An instinct deeper than logic-some sure understanding of the man's recktain that he would be on the spot.

Mingled with her disappointment was a sharp sense of shame. He had told her to come here and wait for him, as if she had been a country milkmald—and here she was meekly waiting. At any rate, she was spared know she had gone to meet him.

The

CREAM AND MILK OF SUPERIOR QUALITY

(Prepared by the United States Department of Agriculture.) Because cream is sold in smaller quantities than milk is no reason why less care should be given by inspec tors in insuring a safe supply of good quality, says the United States Department of Agriculture. It is just as deculin-tested cows or be properly pasteurized, or both, as that milk should. Heavy cream for whipping purposes is sold raw and its quality should be above suspicion. Cream from old or returned milk of poor quality is not desirable.

All cities need carefully defined grades for cream, according to the department, with a fixed minimum for light, table, or coffee cream, which is the usual cream of commerce. federal standard for cream which goes into interstate or foreign commerce is 18 per cent butterfat, and in different cities it varies usually from 18 to 20 per cent. Sometimes what is known as "double cream" is sold, and when that term is used the cream should contain twice as much fat as is required in ordinary cream, usually from 36 to 40 per cent of butterfat. "Whipping cream" may contain less butter fat than "double cream." but, according to a ruling by the bureau of chemistry, cream thus labeled, if shipped, interstate, must contain at least 30 per cent butterfat.

Feeding Will Regulate

milk has received much attention by pervious to all humor except the slapexperiment stations in this country and in Europe, and the evidence is An agricultural audience is superior conclusive that the fat percentage of to an industrial one in intelligence, in the milk cannot be changed permanently by any method of feeding. Certain experiments have shown that sudden changes in the ration, for example, greatly increasing the protein or oil content of the ration, may result in a small fat increase for a few days only temporary No ration or means of which a Shorthorn or Holstein can be made to give milk as rich as that of a Jersey or Guernsey

However, the feed and management does not have a marked influence the quantity of milk produced by the cow. The amount of milk a cow duces depends upon the ability of the cow to convert feed into milk and butterfat and upon the feed and care a to produce milk above her capacity, no matter what kind of feed she gets nor how much.

Calf Feed Important

Experience has taught the impor ance of feeding the calf milk of uniform temperature from day to day. Best results are obtained when this temperature is kept between 80 and 100 degrees Fahrenhelt. A young calf should not be fed milk that has started to sour. The pall should be thoroughly cleansed after each feeding in the winter time as well as during the

Clipping for Cleaner Milk The production of clean milk is made easier by clipping the cow's udder and the tail from the switch up. This will prevent particles of dirt heavily infected with bacteria from dropping into the pail. Another prac tice that will aid in keeping the milk clean is washing the udder with moist cloth and drying it thoroughly before starting to milk.

Dairy Hints

Screen milkhouse.

Cool cream down immediately and eep cool until sold.

Place a solt how in the pasture and keep salt before the cows constantly: Observe new pastures and plan to

seed the poor grass spaces next year. Cream separators and other dairy itensils should always be cleaned properly immediately after use.

All utensils which come in contact with milk and cream should be kept clean at all times.

Milk pails and other utensils

should be free so far as is possible from crevices where dirt may lodge and be hard to remove. The milker should always milk with clean, dry hands. It is a filthy habit, to say the least, to milk with wet

hands, and it is a mistaken idea that

milking with wet hands makes milk-

ing easier. Cleanliness in milking should be exbegins, the cow's udder and flanks should be wiped off, preferably with a damp-cloth, in order to prevent particles of straw or loose hair getting into

If You Need a Medicine You Should Have the Best-Dr. Kilmer's Swamp-Roof

Have you ever stopped to reason why it is that so many products that are ex-tensively advertised all at once drop out tensively advertised all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it:

A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never heaitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the urin acid which causes rheumatism:

You may receive a sample bottle of Swamp-Root by parcel post. Address Dr. Kilmer & Co., Binghamfon, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Advertisement.

THINGS UNUSUAL

By T. T. MAXEY

FANEUIL HALL

Fancull hall, named for Peter Fancult, a public-spirited citizen and Huguenot, who, having decided that Boston needed a town hall in which to hold public gatherings, and a market place, commenced the construc tion of a building 76 feet square which combined these features, and present ed it to the city in 1742,

Twenty years later, the interior was destroyed by fire, but was promptly rebuilt and dedicated to the "Cause of Liberty."

The present building goes back to 1805, when its size was increased to 80 by 100 feet and an additional story added. The upper floor is used now as headquarters and a museum by the Ancient and Honorable Artillery Company of Massachusetts-said to be the oldest military organization in the world. Among the priceless relics is a flag used in 1663 by this organiza-tion. The second floor contains the hall which may be used as a public meeting place by any group of citizens, free of charge, on request to the

ity authorities.
During the Revolutionary war period, Faneull hall was the scene of many tense gatherings. The hall was entertainment by the officers of the British army in 1775 and 1776. Ever since the Revolution, it has been a popular gathering place and noted place for the holding of meetings. banquets and receptions. Its walls have echoed the voice of Daniel Webster, Wendell Phillips, and many other famous patriots of the time.

Situated adjacent to the old State house, and huddled in between mod-ern office skyscrapers in the heart of the business center of "Old" Boston, this comfortable-looking structure of colonial design, hearing evidence of advanced age, is possessed of a dignified appearance and a oulet charm.

A plan is now afoot to rehabilitate, fireproof, and "dress up" this venera-able hall and thereby preserve its original beauty for another generation or two at least. While this work is in process, the wooden awning-like sheds which now disfigure this land-mark of "ye olden times" will be dismantled and replaced by an Iron veranda with a glass roof.

With the single exception of Inde pendence hall, Philadelphia, Faneuil hall is probably of greater historical interest than any other building in these United States.
